TrueFit™ Six Pad Interior

INTRODUCING THE ALL **NEW PRO ULTRA** UNIVERSAL TRIFLOW™ SERIES HELMETS.

Pyrotect's SA2015 Pro Ultra TriFlow™ Helmets are unmatched by the competition in both innovation and safety.

The Pro Ultra TriFlow™ SA2015 Helmets come with an all new TrueFit™ six pad interior system which allows for exact sizing of the helmet insuring a perfect fit. And the exclusive corrugated ridged interior allows for superior heat transfer and increased airflow to keep you cooler with reduced fogging. The ProUltra Helmets are vacuum bagged and autoclave cured for superior helmet strength and durability while keeping the helmet as light as possible.

- > Specifically engineered with 100% Carbon Fiber or a Carbon Fiber composite shell for ultimate safety and performance
- > Vacuum bagged and autoclave curing techniques used to create an extra strength lightweight shell for maximum durability
- > Exclusive TriFlow™ attachments allow for quick modification from a Standard Full Face Helmet to a Forced Air Helmet in (left/right) Side or Top Air configurations
- > TriFlow™ attachments include One Communications adapter and Side and Top Forced Air adaptors
- > New head liner air channel layout for superior comfort, improved air flow and greater heat transfer to keep you cooler at all times
- > Exclusive TriFlow™ padding system with six fully removable pads for ease of cleaning and creating an "ideal" custom fit
- > Reliable stainless steel hardware and Kelvar chinstrap
- > .125 high strength polycarbonate shield with tensioning tear off posts
- > Rubber eye port gasket for a secure seal
- > M6 inserted for head neck restraint devices
- > Fire retardant Nomex interior
- > Snell SA2015 rated
- > Available in White, Black, Flat Black & Carbon
- > Sizes XS to XXL
