UPDATE: APRIL PROJECTS 2014

Staff Members: Joe Johnston, Emmet Reed, and Big Jake strip another brake marker base from its mold and eject the core plug. Placement begins this weekend to meet the counter course certification criteria, and speaking of critters check out this guy and his high traction set up, enjoying some spring warmth by the garage building.

Like the cars that run on the track machinery always needs repair and maintenance. Here the track hoe head bolt bosses get re-taped to allow proper torque settings during assembly.

UPDATE: APRIL EVENTS 2014

Jennifer Serenbetz, Event Coordinator for the Audi Club poses for a snap on the upper paddock during their two cool and beautiful days April 12 & 13<sup>th</sup>.

When you are Operations Manager at O.R.P. you better know how to operate a grill.

At the end of two days with a really fun group every one pack's up and heads home. Well.... almost everyone. The dusty, fast and truly ultra cool Tesla indicated two miles range remaining as the driver opted for just one more lap. True to its instrumentation it shut itself off at exactly two miles (the track is 2.34 miles around) resulting in our first flat tow of an electric car. A quick boost on the charger and he was off to Goldendale. Not a bad day for a guy who didn't use a drop of gasoline all weekend. There is a message here somewhere.

UPDATE: Easter at the track 2014

The first O.R.P. Club events of the season were held on Easter weekend and provided great weather. ABOVE LEFT: Dropping by on their day off were Chief of Flags Jessica Johnston with new daughter Stephi ABOVE RIGHT: Papa Joe helps big sister Marley try a first time fit.

The O.R.P. Track Support Staff relaxes during lunch on Easter Day. Some of the crew members are now in their fifth year with the track. Familial ties and personal friendships augment the culture of this "extended family". A team spirit and core expectation of excellent performance permeates this group and makes them very special to work with. Bill Murray, Operations Manager
